SUKRITI VERMA

sukritiverma786@gmail.com | **+91 8789736059** | linkedin.com/in/sukriti-verma | github.com/sukritiverma786

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Bootstrap
Backend: Node.js, Express.js, JWT, MongoDB, MySQL
Tools & Platforms: Git, Postman, VS Code, CI/CD (GitHub Actions, Jenkins, or similar)

PROFESSIONAL EXPERIENCE

Software Engineer | Demazi Technologies, Noida | Jan 2021 – Present
Lazada Shopping Platform (Jul 2024 – Present)

- Designed and developed a responsive, vendor-integrated e-commerce platform using MERN stack.
- Implemented secure authentication and role-based access using JWT.
- Created scalable MongoDB schemas and optimized query performance for large datasets.
- Built the full stack using MERN (MongoDB, Express.js, React.js, Node.js).
- Led API testing and debugging using Postman and maintained a clean workflow with Git.
- Set up CI/CD pipelines (GitHub Actions) to automate build, test, and deployment processes.
- **Impact:** Improved shopping flow and vendor management, contributing to scalability and smoother user experience.

Tech Stack: MERN, JWT, Postman, Git, GitHub Actions
Admin Portal (Mar 2023 – Jul 2024)

- Built a centralized admin dashboard for real-time analytics, user management, and task assignment.
- Designed key modules including user roles, task tracker, and notification systems.
- Integrated RESTful APIs and applied business logic for dynamic content rendering.
- Collaborated in a 2-member team, handling UI development and backend integration.
- Implemented CI/CD workflows (Jenkins/GitHub Actions) to streamline deployment and reduce manual effort.
- **Impact:** Enhanced productivity and transparency in task assignments for admins and managers.

Tech Stack: React.js, Bootstrap, HTML5, CSS3, GitHub Actions, Jenkins
Income & Employment Verification Platform (Jan 2022 – Mar 2023)

- Developed a privacy-compliant platform to generate and verify income/employment reports.
- Implemented data encryption and secure form handling to ensure confidentiality.
- Integrated third-party APIs to fetch and validate financial data.
- Applied business logic for report generation and eligibility checking.
- **Impact:** Reduced manual verification time by 70% and improved accuracy for stakeholders.

Tech Stack: Node.js, MongoDB, React.js, Bootstrap, HTML5, CSS3
Dynamic Card Application (Dec 2021 – Feb 2022)

- Created dynamic card components that update messages from object arrays using Redux.
- Worked closely with designers to align components with brand aesthetics and UX guidelines.
- **Impact:** Enhanced visual engagement and client branding with a lightweight frontend.

Tech Stack: React.js, Redux, CSS3, JavaScript

Education

MCA in Computer Applications | IGNOU 2022 – 2024
Secured 62%
BCA in Computer Applications | Magadh University 2013 – 2016
Secured 61.46%
